

-Features-

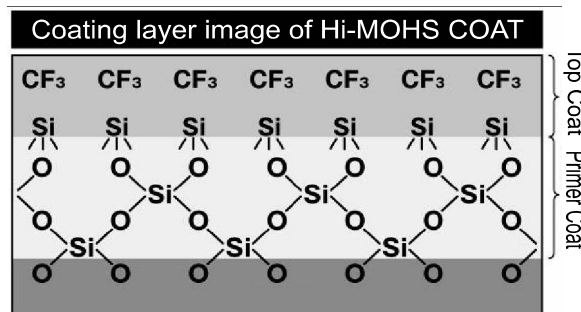

1. Ultra Hard Coating, being true to its name "Hi-MOHS".

Hi-MOHS COAT makes amazingly hard layer whose *Mohs scale of mineral hardness is 7. It offers astonishing anti-scratching effect. Our anti-abrasion test reveals that the durability of Hi-MOHS COAT is about 4 times longer than conventional products.

(*The Mohs scale of mineral hardness characterizes the scratch resistance of various minerals through the ability of a harder material to scratch a softer material. It was created in 1812 by the German mineralogist Friedrich Mohs and is one of several definitions of hardness in materials science.) Excerpt from Wikipedia.

2. High adhesion and long-term durability!

Hi-MOHS COAT makes 2 layers coating: glass system Primer Coat and ultra water-repellent Top Coat. Both of 2 are adopted extremely high reactive formulation, and immediately enter into strong chemical combination after applying coating, to offer excellent durability.

3. Glossy shine, like a glass!

Glass system Primer Coat forms infinitely hyaline like layer structure, and gives deep and beautiful shine.

4. Amazing water and oil proof!

As compared with glass coat adopted fluorine polymer, Hi-MOHS COAT's ultra water-repellent Top Coat, whose reactive fluorine component forms precise and flat layer, gives incomparably strong water and oil proof effect than conventional products. Prevents aquatic and oily stains from attaching to the body, and keeps body beautiful over a long duration.
